** Spaces refreshments with food and drink*

The 3rd Festival of the Fatherhood presents new and old divorced father and the much more children separated from dad fathered.

The victory of the market, public and private, on the termination of family ties have devastated live and expectations of plenty of children, folded their heads on tablets smartphones, has sapped their will to work, erased their dreams to make family.

Philosophers, writers, psychologists, lawyers, social workers and politicians try to explain, together with our children, as they have been deprived of a father figure in everyday life, in the transmission of knowledge and crafts, education of affectivity and mind them marginalized by social competition,

made them helpless in front of the economic exploitation, impoverished and isolated in soft skills.

However, the market divisions / separations / divorces easy and short has not won.

Our networks of social inclusion help housing and food free, Regional funds interventions directly to separated parents and not mediated by the known moneymaking, the subsidiarity that many municipalities address directly to the person and not the useless bodies, to take away to the market its main raison to be: Get rich = impoverished family.

An ambitious program, under the patronage of the Lombardy Region - The Council, supported by the participation of dozens of associations and voluntary reality involve a new political class on 'Act of Senate n ° 1756 laying "Provisions of shared custody of the children."

Festival's various initiatives is published to web the site
